2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Newton on 05/18/2010.

The application has been amended as follows:

- b. In claim 12, "operative to" on lines 2, 4, 8, 10, 14, and 17 has been replaced by configured to
- c. In claim 14, line 2, "operative to" has been replaced by configured to
- d. In claim 15, line 2, "operative to" has been replaced by configured to
- e. In claim 16, lines 10 and 11 limitation "means for computing a decoded base stream based on the LLRs for code bits of the base stream;" has been removed from the claim
- f. In claim 28, "operative to" on lines 2, 4, 6, 8, 10, 12, 17, and 19, has been replaced by configured to

Allowable Subject Matter

3. Claims 1, 3-9, 11, 12, 14-16, 20, 21, 25, 26, 28, 31 and 38-68 are allowed. The following is an examiner's statement of reasons for allowance:

As to claim 1, 3-9, 11, 12, 14-16, 38-58, a comprehensive search of prior art of record failed to teach either alone or in combination a method/apparatus for: deriving log-likelihood ratios (LLRs) for code bits of a first data stream based on received symbols for a data transmission, wherein the first data stream is a base stream for a hierarchical coded data transmission; deriving data symbol estimates for the first data stream based on the received symbols; decoding the LLRs for code bits of the first data stream to obtain decoded data for the first data stream; estimating interference due to the first data stream based on the data symbol estimates for the first data stream; re-

encoding and remodulating the decoded data to obtain remodulated symbols for the first data stream, wherein the interference due to the first data stream is estimated based on the remodulated symbols; deriving enhancement LLRs based on the estimated interference due to the first data stream and the received symbols; adjusting the enhancement LLRs based on the remodulated symbols and the data symbol estimates, comprising: detecting errors in the data symbol estimates based on the remodulated symbols, and setting LLRs for code bits of the data symbol estimates detected to be in error to erasures for decoding; and computing a decoded enhancement stream based on the enhancement LLRs, wherein the decoded enhancement stream is an enhancement stream for the hierarchical coded data transmission.

As to claims 20, 21, 25, 26, 28, 31, and 59-68, a comprehensive search of prior art of record failed to teach either alone or in combination a method/apparatus for deriving log-likelihood ratios (LLRs) for code bits of a first data stream based on received symbols for a data transmission; deriving data symbol estimates for the first data stream based on the received symbols or the LLRs for the code bits of the first data stream; decoding the LLRs for the code bits of the first data stream to obtain decoded data for the first data stream; re-encoding and remodulating the decoded data to obtain remodulated symbols for the first data stream; estimating interference due to the first data stream based on the data symbol estimates; deriving LLRs for code bits of a second data stream based on the received symbols and the estimated interference; adjusting the LLRs for the code bits of the second data stream based on the remodulated symbols and the data symbol estimates for the first data stream;

performing an error detection function for the data symbol estimates based on the remodulated symbols; deriving correction factors for the data symbol estimates detected to be in error; and updating LLRs for code bits of the data symbol estimates detected to be in error with the correction factors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
